Cinema 4D
ToonBoom Harmony
Illustrator
Photoshop
Premiere
V-Ray
Arnold
Mental Ray

EXPERIENCE

senior animator

nick jr / august 2016-present

As senior animator, I direct projects such as digital short form content and on-air promotional packages. My daily tasks include motion design, 2D and 3D character animation, compositing and editing. I interface with project managers and stakeholders, direct junior team members and brainstorm new creative and technical solutions to help create streamlined and aesthetically interesting projects as efficiently as possible.

design animator

fisher-price / june 2013 - july 2016

I served as motion designer, character animator, and video editor on a diverse array of projects, including entertainment music videos, product visualizations, marketing presentations and social media materials. I was often responsible for the entire content creation pipeline of a project, from concept and design through completion, communicating directly with my clients to find the most impactful visual marketing solutions.

motion designer

t-mark international / may 2014-february 2015

Designed and animated infographic-style motion graphics videos, providing storyboarding, asset creation, and animation services.

graphic designer

magnifeco.com & ecosessions / june 2012 - 2015

Created a graphics style guide as part of a rebranding overhaul, developed and coded email newsletter templates and created the site's first holiday gift guide magazine. Also worked on sub-branding for EcoSessions and created promotional materials for print and web.

graphic designer/illustrator

benesse america / 2014-2015

Created visual media for the StraightAce Math online educational software. Content ranged from charts and graphs to illustrated diagrams and fun illustrations that enhance lessons and augment instructional and aesthetic value.

content design intern

fisher-price / 2013

Designed concepts and helped brainstorm for a new app-based brand IP, generated animated models in both 2D and 3D software, created layouts and illustrations for digital publications, and mapped current trends in design and gaming to help the team determine the best styles for new projects.
